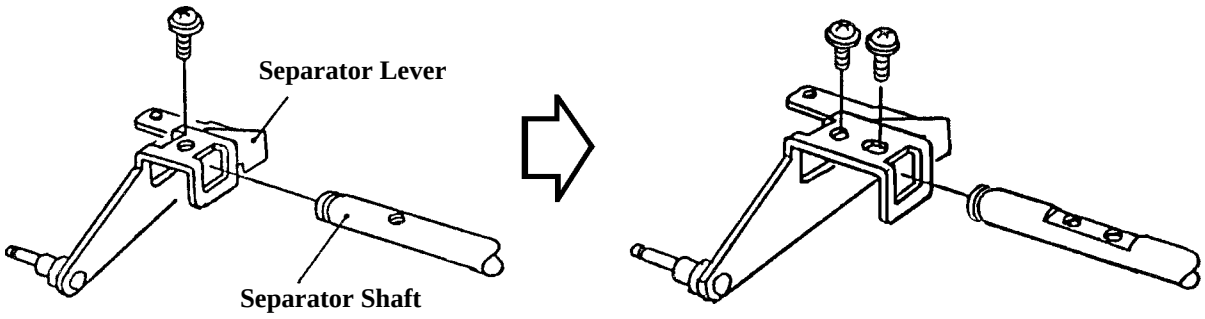
[BRIEF]

1. The Separator Lever has been reformed to include another screw hole.
2. Another screw hole has been added to the Shaft to secure the Lever.
3. The surface of the Shaft has been cut in a “D” shape to secure the lever.

[REASON]

1. To prevent the deformation of the Separator Lever.
2. To attach the Separator Lever to the Separator Shaft more securely.

[APPLICATION TIPS]


When replacing the existing Separator lever with the modified one, replace the existing Separator Shaft at the same time, or vice versa.
